

## Know the *Truth* about Amendment 2

### Private Dollars from Public Money

Amendment 2 not only attempts to **deceive** Missourians and exploit women, it gives biotech special interests a blank check to do it with taxpayer money.

- Page 3 says no one can deny public money to a firm doing the kind of unethical experimentation the amendment allows.
- Of the \$24 million currently funding the Amendment's campaign, 95% comes from one wealthy source. That source understands that its biotech special interests stand to make a lot of money from patents - even if no cures ever come from human cloning and embryonic stem cell research.
- The Constitution has never been amended to give this type of taxpayer-funded financial windfall to a special interest.

Adult stem cell research is where Missourians focus should be, not on Amendment 2 which is unnecessary and promotes **PRIVATE DOLLARS FROM PUBLIC MONEY**.
